EDUCATION

West Virginia University | **Morgantown, WV** May 2026
Bachelor of Science in Computer Science & Cybersecurity (ABET-Accredited)
GPA: 3.52 | Minor in General Business

RELEVANT EXPERIENCE

Software Developer Intern (STEM) June 2025-August 2025

Akima | Herndon, VA

- Automated validation and AI-driven scoring to flag issues and improve efficiency in processing government financial documents
- Built a secure web platform with Next.js and Fast API, using Keycloak JWTs to deliver tailored dashboards by user role
- Developed an AWS workflow (Textract, Lambda, Bedrock, SES) to extract, analyze, and route financial data into a RAG chatbot
- Facilitated agile delivery as Scrum Master for a 4-person team, driving daily stand-ups and completing 7–8 Jira stories each sprint

Software Developer Intern (STEM) June 2024-August 2024

Akima | Herndon, VA

- Delivered real-time emergency coordination platform MVP in 10 weeks, enabling first responders to coordinate incident response 2x faster than the existing system
- Led a 7-member cross-functional team as Scrum Master, driving SRR reviews and milestone delivery
- Partnered with software, finance, and civil engineering teams to integrate expertise and improve results
- Developed a Unity3D VR construction app for Meta Quest 3, enabling 20 users with avatars to build collaboratively

PROJECTS

Design of a Simple CPU August 2023-December 2023

West Virginia University | Morgantown, WV

- Designed an 8-bit CPU equipped with 32 bytes of RAM and 3 different op codes
- Implemented on the Intel DE-10 Lite FPGA device and programmed in VHDL

Recipe Finder Web Application January 2024-May 2024

West Virginia University | Morgantown, WV

- Created a web application that holds recipes and finds recipes based on ingredients set by the user
- Implemented login and posting authentication along with API integration using the RapidAPI platform
- Deployed backend infrastructure on AWS Lambda and DynamoDB, with GraphQL API handling 500+ user queries daily

Industrial Robotics Tool Masking August 2025-May 2026

West Virginia University | Morgantown, WV

- Developed a high-precision frame calibration system for Universal Robots (UR) using Python, implementing a 4-touch calibration ball routine to calculate Tool Center Point (TCP) and offsets accurately
- Architected a robust data management pipeline to record and load calibration telemetry, utilizing .npz files for efficient storage and retrieval of complex NumPy arrays
- Designed and deployed an interactive GUI using CustomTkinter, streamlining the end-to-end calibration process and improving accessibility for non-technical operators
- Optimized robotic spatial accuracy by automating coordinate transformation calculations, reducing manual setup time, and ensuring consistent hardware alignment

Portfolio Website July 2025-July 2025

- Showcased my software development and cybersecurity projects with a responsive design
- Built with React, Tailwind CSS, and JavaScript
- Implemented an interactive UI/UX that engages the user throughout the entire application

Tic-Tac-Toe Game Application August 2025-August 2025

- Constructed dynamic boards (3x3–6x6) with optional animal avatars and AI or friend play
- Animated, responsive design with turn indicators and instant endgame feedback
- Built with React, Vite, CSS5, and JavaScript, fully customizable

CERTIFICATIONS

AIG Shields Up: Cybersecurity Virtual Experience Program on Forage

January 2025

- Conducted threat analysis, reviewed CISA alerts, and used Python to brute-force decryption keys.

PwC US Cybersecurity Consulting Job Simulation on Forage

January 2025

- Assessed risk controls, documented testing, and summarized findings in a client-ready slide.

Deloitte Australia Cyber Job Simulation on Forage

January 2025

- Analyzed web logs and identified suspicious user activity in a breach scenario.

Telstra Cybersecurity Simulation on Forage

January 2025

- Investigated malware, executed incident response, and completed a postmortem report.

TECHNICAL SKILLS

Programming Languages: C, C++, C#, Java, SQL, VHDL, Python,

Scripting Languages: JavaScript, HTML, CSS

Developer Tools: XCode, Eclipse IDE, MySQL Workbench, Quartus Prime, Microsoft Office Suite, Google Suite, Github, Navigate, Ellucian-Banner, Visual Studio, UTM, RedHat, Unreal Engine, RapidAPI, AWS, Jira, Confluence, Trivy

Frameworks: React, Node.js, JUnit, Bootstrap, Tkinter

Spoken Languages: English and Twi
